No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

Sainris Sciureus (Common squirrel monkey).
Eukaryota: Metazoa: Chordata: Cremiata: Vertebrata: Euteleostomi:
Mammalia; Eutheria: Primates: Platyrrhini: Cebidae; Aotinae: Aotus.
--- FUNCTION: INSULIN DECREASES SLOCD GLUCOSE CONCENTRATION. IT INCREASES CELL PERMEABILITY TO MONOSACCHARIDES, AMINO ACIDS AND FATTY ACIDS. IT ACCELERATES GIZCOLYSIS, THE PENTOSE PHOSPHATE CYCLE. AND GLYCOGEN SYNTHESIS IN LIVER.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           MEDLINE=88041119; PubMed-3118367;
